 [Aarush Rawat](#) |  [AarushR1205](#)

SUMMARY

Final-year B.Tech CSE student with hands-on experience in machine learning, NLP, and software development. Skilled in building end-to-end projects using Python, Scikit-learn, and Streamlit. Strong problem-solving abilities with a growing interest in deep learning and generative AI, seeking entry-level roles in AI/ML and software development.

EXPERIENCE

Full Stack Developer Intern — SmartEd Innovations

(Jun 2025 – Sep 2025)

- Developed a Job Listing Portal demonstrating full-stack development expertise.
- Implemented responsive UIs and ensured cross-device compatibility.
- Maintained clean, modular code following best practices.
- Managed codebase using Git & GitHub for collaborative version control.

Data Science Intern — Innovateloop Solutions

(Feb 2026 – Mar 2026)

- Worked on data preprocessing and analysis using Python (Pandas, NumPy) to clean, transform, and extract insights from structured datasets
- Built and evaluated machine learning models (e.g., Logistic Regression / Decision Tree) to solve real-world business problems
- Performed data visualization and reporting using Matplotlib/Seaborn to communicate insights and support data-driven decision-making

PROJECTS

Heart Stroke Prediction Web App

Deployment Link: <https://heart-stroke-predictionzbzpmzky8hcbcd3hdvvr.streamlit.app/>

- Built and deployed a machine learning web application that predicts heart disease risk using a KNN classification model.
- Implemented data preprocessing, feature scaling, and model serialization using Joblib.
- Developed an interactive Streamlit dashboard with real-time predictions and risk visualization.

Job Listing Portal – Full stack development

GitHub repository : <https://github.com/AarushR1205/job-listing-portal.git>

- Developed a full-stack MERN job portal enabling employers to post jobs and candidates to apply, with role-based dashboards and application tracking.

- Integrated real-time features using Socket.IO and implemented secure authentication via Firebase Authentication (Email/Password + Google OAuth)
- Built AI-powered functionalities using Google Generative AI, including resume parsing and intelligent candidate-job matching.

Movie Reviews Sentiment Analyzer

Deployment Link:

<https://movie-review-sentiment-analyzer-r7fnhhfbjktehzjtp7mb3x.streamlit.app/>

- Built a sentiment analysis model using NLP techniques and TF-IDF vectorization to classify movie reviews as positive or negative
- Trained and evaluated machine learning models (Logistic Regression/Naive Bayes/TF-IDF) achieving ~85%+ accuracy. Followed clean code practices and modular architecture for scalability and maintainability
- Developed an interactive Streamlit web app for real-time sentiment prediction from user input

TECHNICAL SKILLS

Programming Languages: Python, SQL, C++, Javascript,

Web Technologies: HTML, CSS, React.js, Node.js, Express, MongoDB

Technical Skills: AI, Machine Learning, Deep Learning, Gen AI, Data Structures and Algorithms, Computer Networks, Operating Systems, DBMS

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Tensorflow, FastAPI, Langchain

Tools: Jupyter Notebook, VSCode, GitHub

Soft Skills: Communication, Team Collaboration, Leadership, Problem Solving

CERTIFICATIONS

- Full Stack Development — SmartEd Innovation
- Introduction to Cybersecurity — Simplilearn Certificate
- Artificial Intelligence Fundamentals – IBM SkillsBuild

EDUCATION

Delhi Technical Campus (Affiliated to GGSIPU)

B.Tech, Computer Science & Engineering | 2022 – 2026

CGPA: 7.2 / 10 (72%)

DPS R.K. Puram — CBSE

Class 12: 73% (2022) | Class 10: 91% (2020)
